email: [info@alltablesports.com.au](mailto:info@alltablesports.com.au)  
web: [www.alltablesports.com.au](http://www.alltablesports.com.au)

## General Warnings

Unpacking and assembly operation should be carried out entirely by adults. Keep children away throughout all steps. All small parts such as bolts, screws etc. not yet assembled, and nylon bags might be swallowed or inhaled.

## Care and Maintenance

The model you just bought is for INDOOR USE. For this reason we suggest you install and keep the table in an indoor environment, with low humidity levels and away from direct sun light.

In order to keep your table's performance at a high level, we suggest you follow the product usage instructions and clean it periodically.

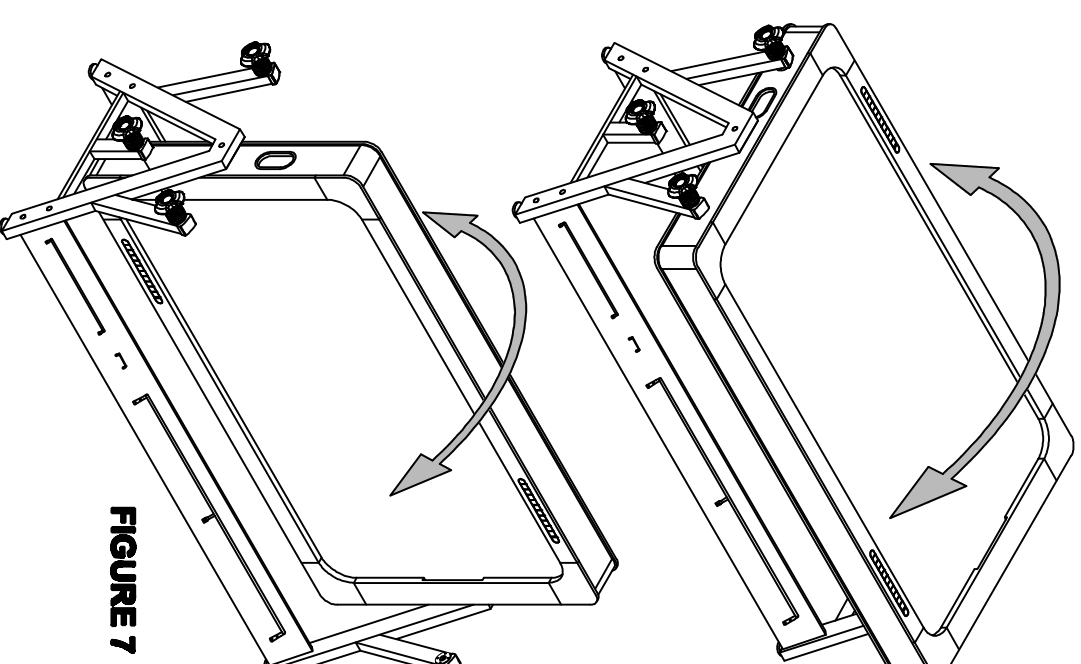

For body, frame, legs and air hockey top, normal dust can be cleaned by using a humid dust cloth. For difficult stains, you may use abrasive-free detergents. But for pool table cloth, only use the brush included in the accessory kit.

Instruction for correct product usage:

1. The table should only be rotated by adults, or teenagers supervised by adult. Do not allow children to rotate table without supervision.
2. To rotate table, release lock knobs H2 at both ends of the table in both leg frame assembly's, this will allow you to turn the table from one game (pool) to the other game (air hockey).
3. Make sure no one is in the way, slowly rotate the table to change to the other game, align the lock knobs H2 to the locking plate in the body of the table, push firmly giving it half a turn at the same time locking knob into position.
4. Be aware whilst turning the table keep your hands and fingers away from the pivot axle bolt H1, this highlighted by a warning sticker on the side of the leg frame P3, "Danger", turning table crush points, keep hands clear of gap.
5. When playing air hockey, always plug the power cord to power source to have fan turned on, this helps make the puck A7 move more fluid when moving over the surface of the table and reduces the abrasive effect of the slide of the puck, protecting the air hockey table surface and the line markings, reducing the wear and tear.
6. Check table surface is clean of dust and grime, as this can slow the efficiency of the sliding puck. Wipe the dust off with a soft cloth.
7. Do not drag table across the floor it is best to lift it to move from one position to another, do not stand on the leg frames, as these actions could put stress on the thread of the levelling feet on the bottom of the table legs.
8. Use the brush A3 that is included in the accessories kit to brush clean any dust that may accumulate on the pool table cloth it may impede the free roll of the ball.
9. Check the felt pads on the base of the air hockey pushers/bats for any extraordinary peeling, or lifting which may occur with normal usage and wear and tear, if so stick down, or replace.
10. The manufacturer/supplier warrants all goods to be free from defects in material and workmanship/construction (unless stated/informed before the customer's purchase), and of acceptable quality and durability in every possible way!

## ROTATING YOUR TABLE

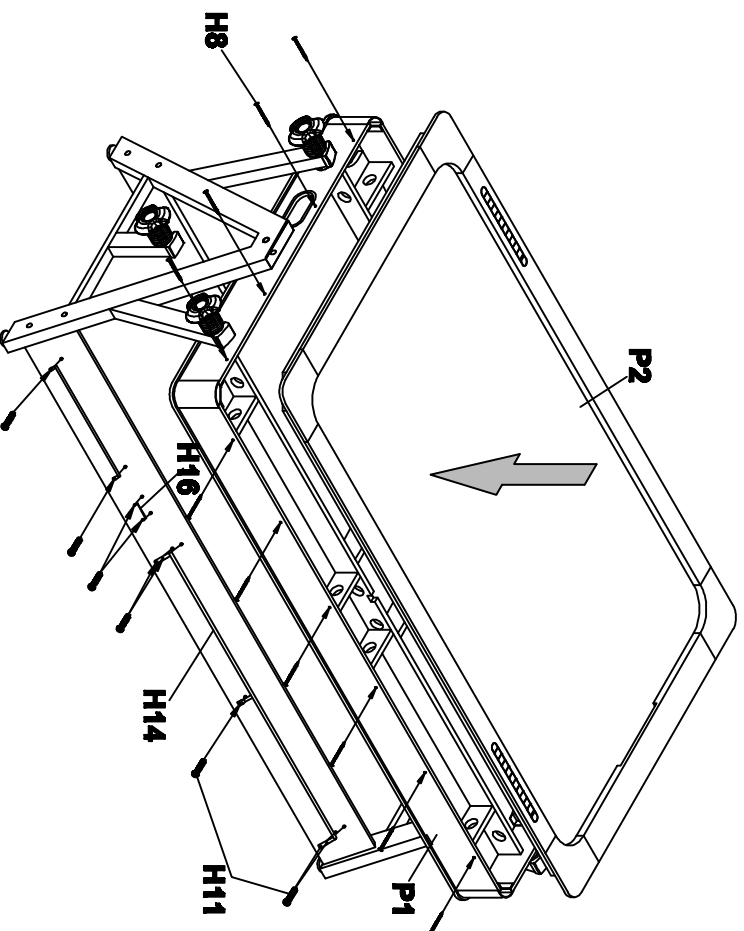

To rotate, loosen the 4 knobs (two on each leg assembly) until they are free of the table. Make sure there is no one in the way, slowly rotate the table. After rotating the table, carefully align the knobs with the holes in the braces on the game table and tighten the knobs. Do not over tighten the knobs.

# ASSEMBLY INSTRUCTIONS

7. Lift the table up to stand on its feet and rotate table top so pool table is facing the ground. When doing this do not lift by holding the leg panel P4, this panel is not weight bearing only for stabilising legs P3. Before securing the air hockey facia to the table please ensure that the cord and plug have been located from within the table (attached to the motor/fan) and is threaded out of the table via the side opening. Ensure that the cord is not trapped between any layers before securing the facia and side panels. Place the hockey table P2 on the bottom of the pool table and secure with screws H8 as shown in FIGURE 6.

8. Attach Brace H14, H15, H16 to the Leg Panel P4 with Bolts H2.

**FIGURE 6**

11. Some components are packed inside the table body, please lift off the air hockey playing top to take them out for installation

When flip over the table, make sure to rotate SLOWLY with care. Keep rotating at high speed may cause damage on turning axle.

## Warranty

The 7ft Flip over Pool / Air Hockey Table has 12-Month warranty for its products starting from the acquisition date. Warranty covers manufacture ring defects only.

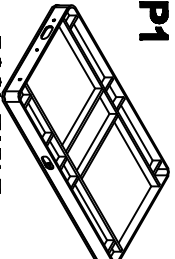

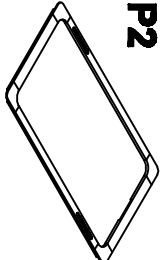

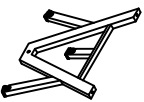

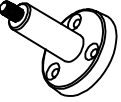

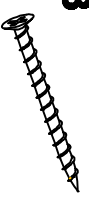

## Warranty does not cover:

- Normal wear and tear
- Damage arising from abnormal use, neglect, abuse, or incorrect installation by the purchaser or third party
- Damage resulting from flood, fire, earthquake or other natural disasters
- Products which have not been maintained (e.g. with wood, leather, metal, fabric, plastic care), or which have been modified.
- Insignificant minor variations in dimensions, colour, rental trade, finish, and very minor chips or superficial blemishes
- Non-commercial tables used in commercial, rental trade, institutional or other non-residential use
- Warranty will end immediately if the games table becomes defective as a consequence of misuse, lack of proper care and maintenance, used in an improper environment or handling in transit

## Table Features Key Point:

- Switch games easily
- Tough textured cloth
- Steel end frames
- Power cord storage compartment
- Lock and store table vertically for space saving
- English style pockets
- Steel beam pool table support
- Quick release locking knobs
- Adjustable levelling feet
- Accessory storage racking on leg panel

# ASSEMBLY INSTRUCTIONS

6. Attach the leg panel P4 at the bottom of the legs using bolts H7 and washers H6. Start all bolts first by hand and then tighten all hardware.

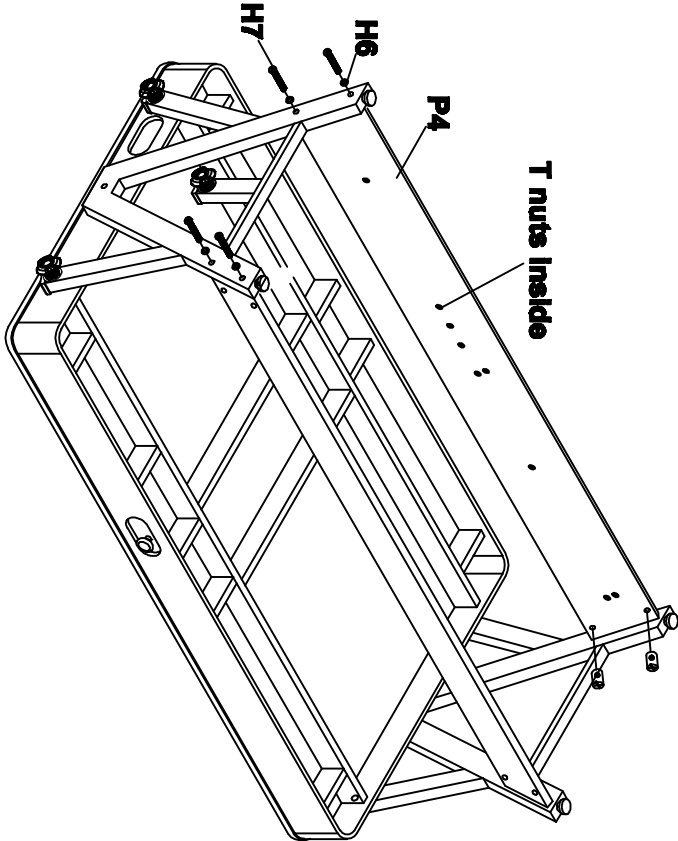

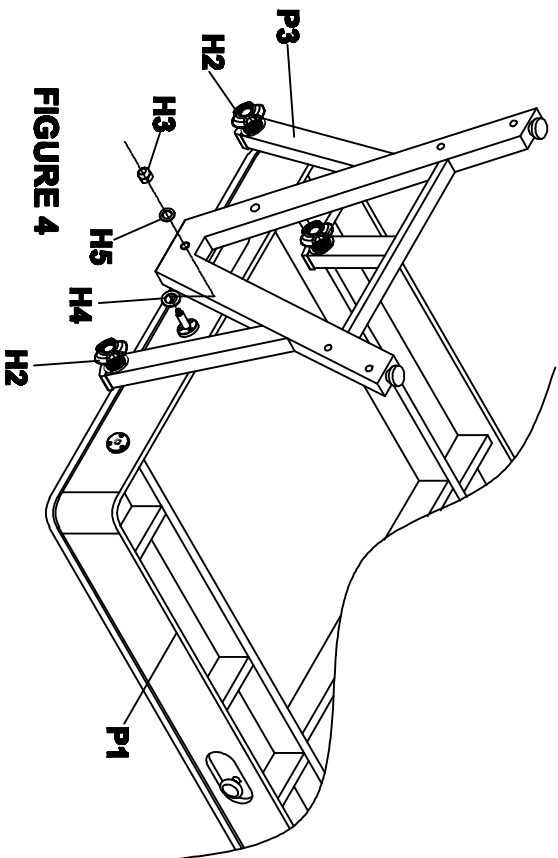

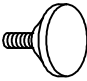

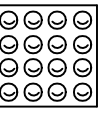

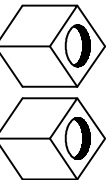

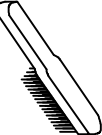

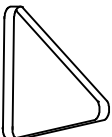

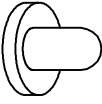

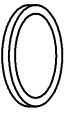

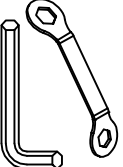

FIGURE 5

# ASSEMBLY INSTRUCTIONS

5. The pool table face (P1) should be face down to the ground, air hockey face to be added later. Once in the correct position, carefully attach one leg assembly P3 to each end of pool table. Start with the centre leg attachment. Place a washer H4 onto the axle bolt. Next slide the leg assembly on to the bolt and secure with washer H5 and lock nut H3. This is a pivot point. Do not over tighten this nut. Next Secure the knob H2 by threading them into the braces on side of table's body. Repeat this step for the other side of the table.

# ASSEMBLY INSTRUCTIONS

1. Find a clean, level place to begin the assembly of your pool table. We recommend building the table on the box lid to protect the parts during assembly.
2. Place pool table P1 up-side-down and attach the ball catcher P5 using screws H10 as shown in FIGURE 1

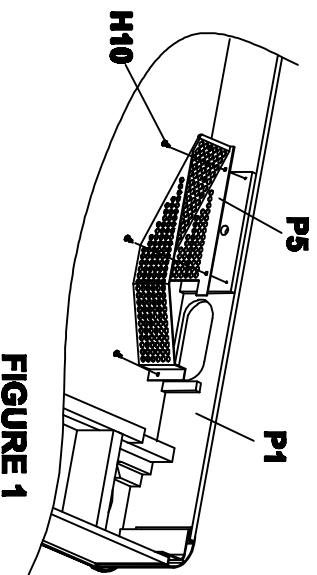

FIGURE 1

3. Attach the axle bolt H1 to the end panel of the pool table using bolts H9 , washer H17 and lock nut H18 as shown in FIGURE 2.
- Have caution not to over tighten these screws.

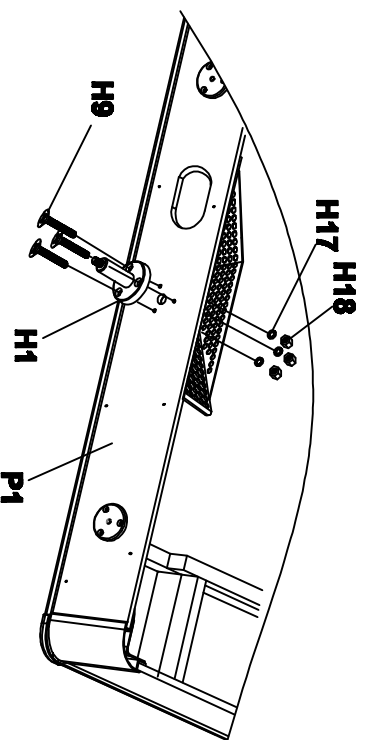

FIGURE 2

# ASSEMBLY INSTRUCTIONS

4. Push the lock knobs H2 through the holes in the leg assembly. Once the lock knob is through,attach one lock collar H13 to each knob as shown; Attach the leg levers H12 to the leg assembly P3 as shown in FIGURE 3.
